Meeting People's Needs Through Community Based Forest Management in India

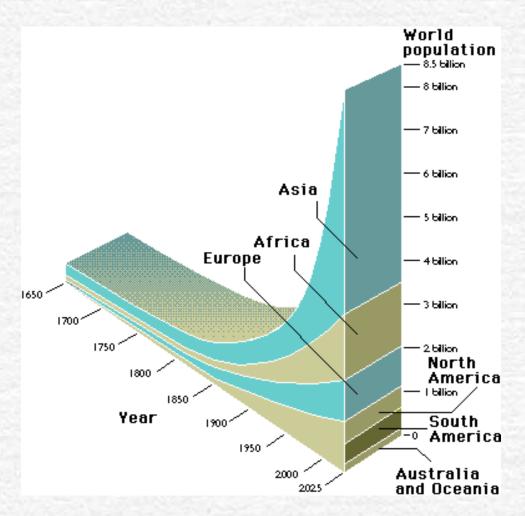

Challenges and Expectations

Global Population

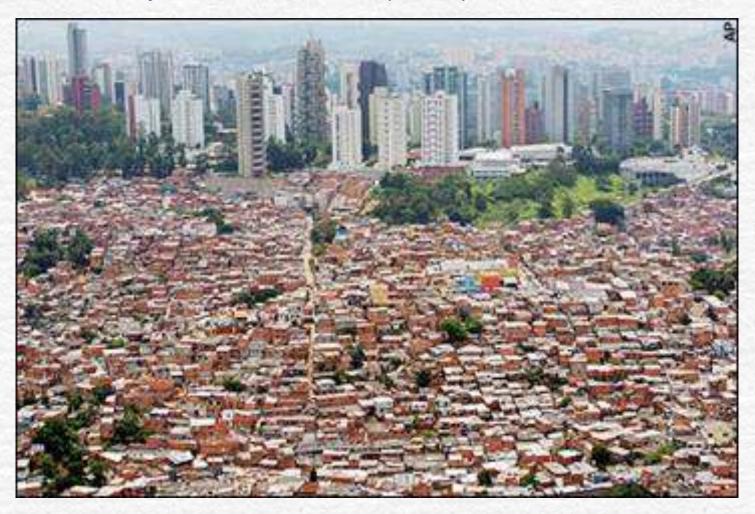

Continues to grow at 75 to 80 million per year

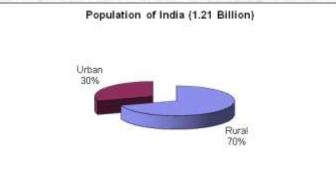

Population of India (2011): 1.21 billion

Poor Living Conditions

No drinking water

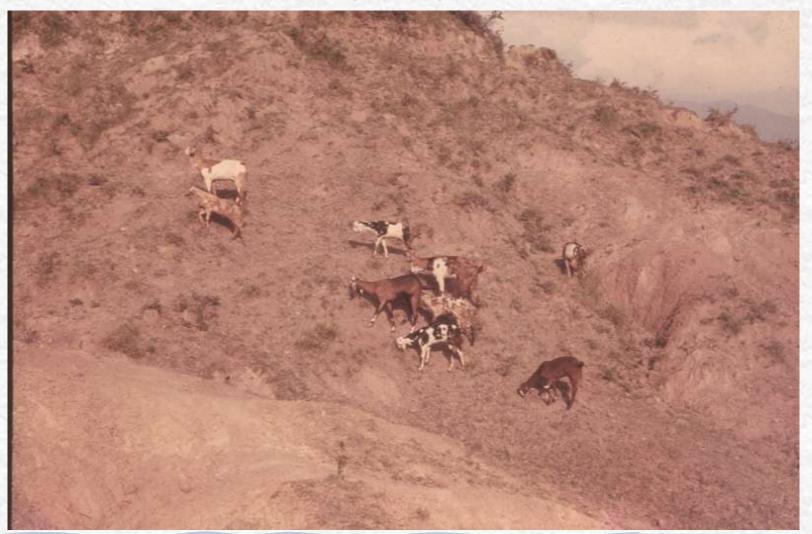

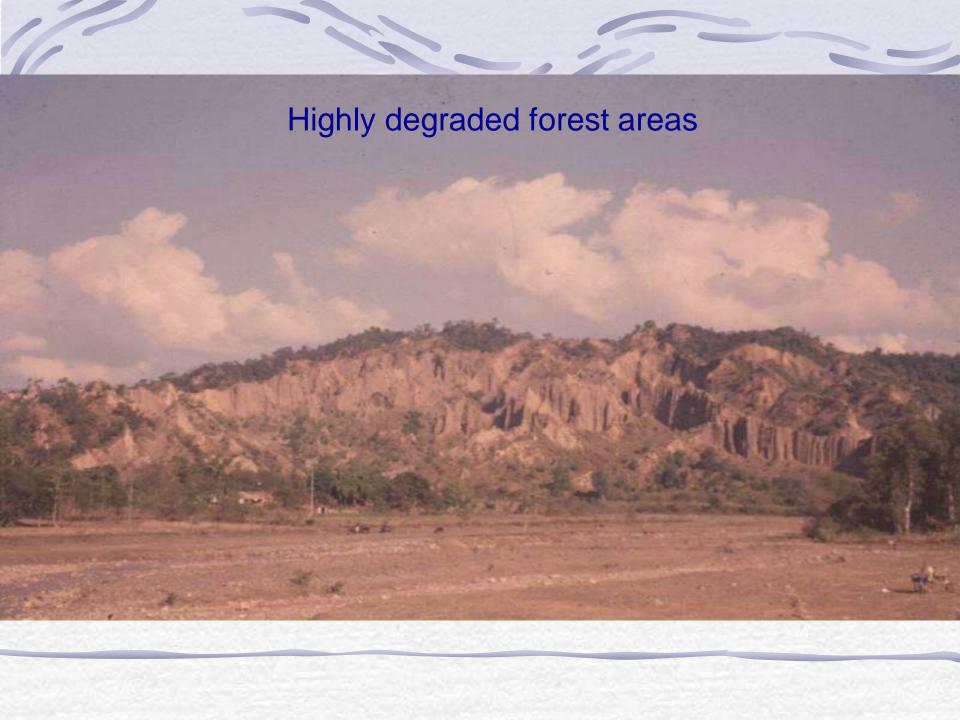

Extreme dependence on forests

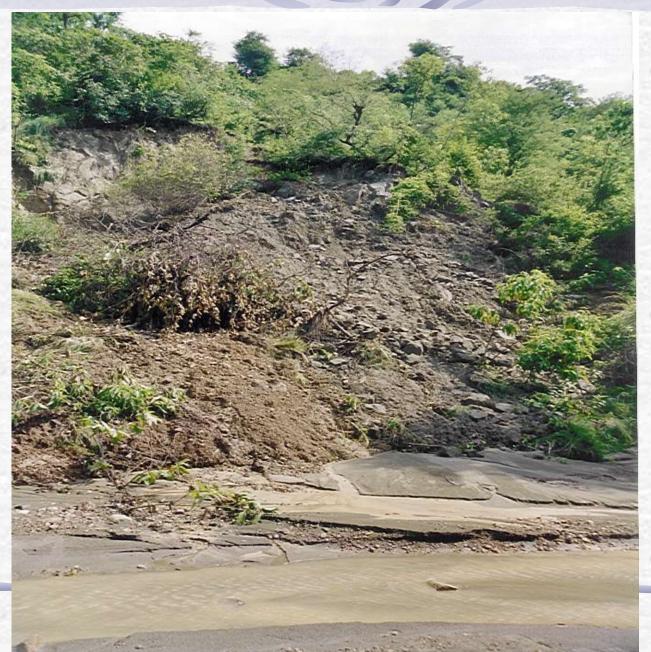

Resource

Overgrazing

Heavy Soil Erosion

Community Based Forest Management

- Local communities assist forest department (Government) with forest management
- They provide forest protection
- 25%-50% revenue sharing in timber harvest
- Full rights on minor forest produce
 (fuel wood, food, fodder, and medicinal plants)

Village Forest Protection Committees

Involvement of People in Decision Making

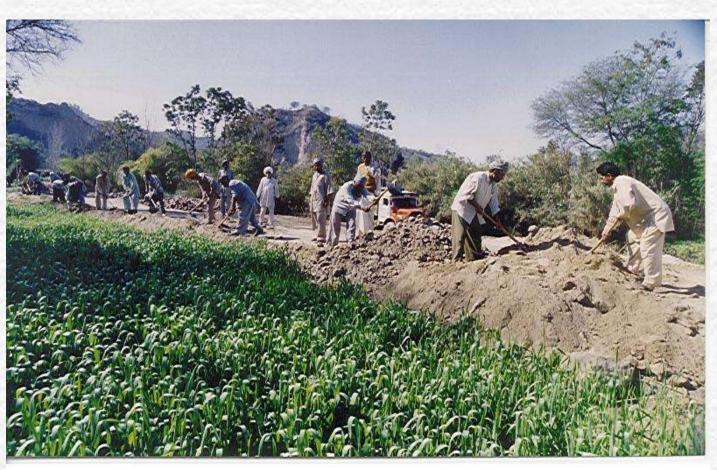

Community Involvement

Salient features

- Government identifies suitable entry point developmental activities for welfare of the local community
- Specifically involves local women and takes care of their forest based and developmental needs
- Self Help Groups of women for income generating and value addition activities have been facilitated

Community Participation in Works

Augmenting Water Resources

Veterinary support

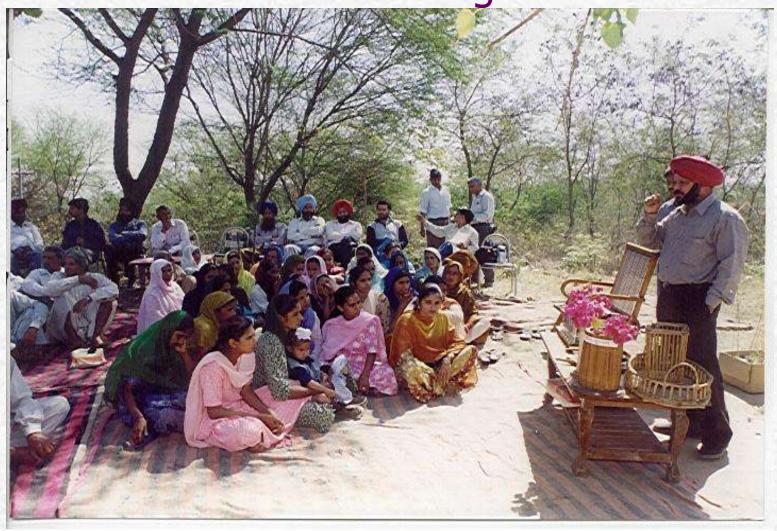

Forest Based Income Generation Activities Capacity Building

Rope Making

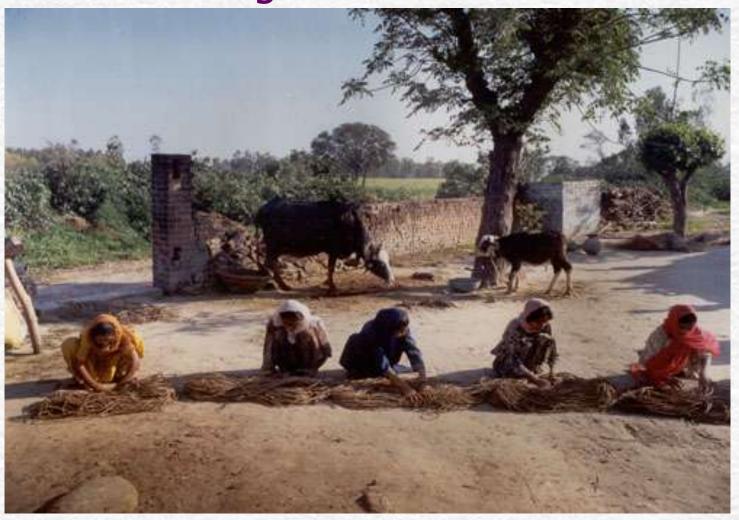

Lantana Furniture Making

Vermiculture

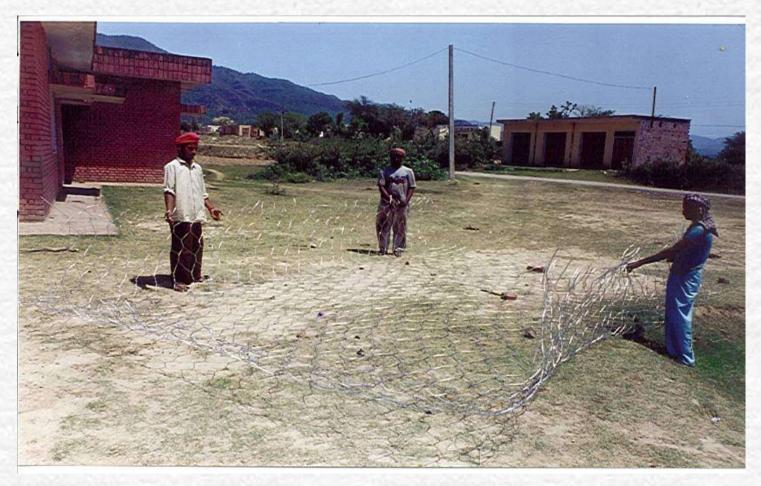

Basket Making

Bee Keeping

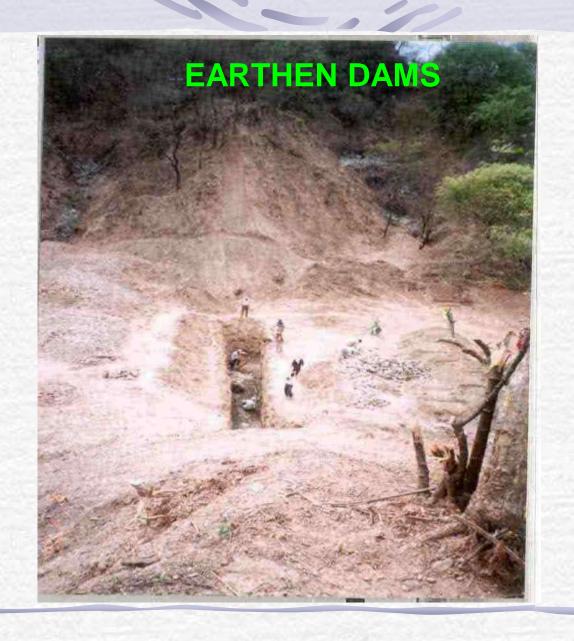

Building Technical Skill of Local Villagers

Soil and Moisture Conservation Works

Rehabilitation with Mechanical and Vegetative Measures

Sharing information with villagers

Lessons

- Individuals or communities bring knowledge, experience, intuition, skills, ethics, creativity, enthusiasm and willingness to cooperate
- Inherent capacity within society is there to be utilized and at virtually no extra cost
- Collectively this can be a powerful force for good
